Title - **Reflected XSS** in /search?q= via thr "q" Parameter

Desc: The website search functionality is vuln to XSS this may lead to account takeover or stealing sensitive data from users.

POC

1. got to juice-shop
2. Type in the XSS payload in the search bar like

<img src=x onerror=alert('XSS')>

3. you can exploit this by going this this link directly:

https://juice-shop.herokuapp.com/#/search?q=%3Cimg%20src%3Dx%20onerror%3Dalert('XSS')%3E
